SECTION C DESCRIPTIONS AND SPECIFICATIONS

PERFORMANCE WORK STATEMENT (PWS) FOR ENGINEERING (ENERGY) SUPPORT SERVICES CAMP LEMONNIER, DJIBOUTI, AFRICA

Updated: 09 Sep 2017

1. SCOPE

Under this task order, the Contractor will independently provide services as set forth in this document in support of the overall operational objectives of Naval Facilities Engineering Command Europe Africa Southwest Asia (NAVFAC EURAFSWA). This contract/task order requirement is to provide Energy/engineering support services for the Public Works Department (PWD) located at Camp Lemonnier, Djibouti. Primary duty is as follows:

- A. Installation Energy / Engineering Management (IEM) support services for the Facilities Maintenance Division, Public Works Department (PWD) Djibouti, NAVFAC EURAFSWA

The Contractor shall provide oversight and administration of all Contractor staff and shall direct the efforts in response to specific task orders, work requirements and administrative support needs. This includes addressing all Community Management, Human Resource needs, planning and coordinating leave, and conducting employee reviews and appraisals.

The Contractor shall be responsible for ensuring the accuracy, timeliness and completion of all tasks under this effort. The Contractor shall be responsible for providing all materials, equipment and labor, to include technically qualified personnel to perform the services identified, unless specifically excluded in this PWS. The Contractor shall submit an updated management plan within five working days following Contract award that outlines how Contractor employees on the task order will be managed to perform the requirements of the contract. It is permissible to submit an updated version of the management plan submitted in Section M of the solicitation. The updated Management Plan shall not exceed ten (10) pages.

Each offeror submitting a proposal shall confirm experience, qualifications, certifications, licenses, physical abilities and other requirements in this PWS and shall affirm the ability to meet performance period, location and security requirements as defined. Within three working days following award, the Contractor must submit documentation verifying that each employee assigned to perform work meets or exceeds the qualification requirements stated herein for Government acceptance. This submission of qualifications requirement remains for any subsequent employees. If, during the performance of services, any Contractor employee cannot continue to meet the requirements for any reason, the Contractor shall ensure that there is no gap in services longer than 14 calendar days per occasion and 21 cumulative calendar days annually. However, the Government reserves the right to prorate payment for such services if not performed. Alternate employees assigned by the Contractor to perform work in the absence of previously qualified personnel must have similar documentation presented for Government acceptance verifying qualification compliance as described in this paragraph. In all such cases, the Contractor POC stated in Paragraph 24 shall coordinate absences or leave with the

Government Project Officer stated in Paragraph 23 and the Administrative Contract Specialist as early as possible.

2. ORGANIZATION

These services will be performed at Camp Lemonnier, Djibouti in support of the Public Works Officer, the head of the Public Works Department (PWD).

3. TASKS/SERVICES

3.A Energy/Engineering, Planning and Estimating support services:

The Contractor's role is to support NAVFAC and its Clients with identifying, defining, scoping, estimating and developing energy-focused job packages for both contracts and in-house execution and additional energy related consulting services. To accomplish this function the incumbent will provide engineering support and comprehensive energy management services.

Engineering service requirements include the responsibilities of managing the planning, developing requirements, and estimating costs associated with energy-related utility/facility requirements for repairs, alterations and minor construction projects (CAT III/IV). The incumbent will be responsible for the development of energy and water conservation projects to manage and reduce utilities consumption and demand. The Contractor shall focus on: developing facilities energy efficiency improvements, developing distributed generation opportunities, assisting in development of renewable energy projects, providing energy training, performing design reviews, analyzing energy and utilities data, recommending improvements to utility procurement and operations. The incumbent will identify energy conservation opportunities and help facilitate the implementation of projects, initiatives, and programs that reduce energy consumption and demand, and be an on-site action agent to facilitate energy and cost savings; work with Government Clients to identify and define requirements, monitor and report on status project execution, locate and identify funding sources for energy projects and recommend to appropriate personnel such as Utilities and Energy Management (UEM) Branch Head, Production Director, Facilities Management Director, and/or Public Works Officer.

This contract is based on 2080 work hours during the 12 months of service. These hours do not include personal and sick leave or any other time that does not directly support the services outlined in this paragraph. Personnel are expected to perform at a pace no more than 45 work hours per week, unless there is an official United States holiday listed in 8A during the week. As support is not normally required during official holidays, the required level of support is reduced by 8 hours for each holiday.

Energy/Engineering support services include, but not limited to:

3.A.1 Provides project management and coordination for the development and implementation of energy conservation projects including Utility Energy Services Contracts (UESC), Energy Savings Performance Contracts (ESPC), Energy Conservation Investment Program (ECIP), Restorations and Modernization energy (RMe) and direct funded projects. Leads efforts to research, justify, and implement energy conservation projects as well as ensures all future projects consider efficient energy design/usage (e.g. design review). Prepares projects to reduce energy, solid waste, water, and sewer costs. Generates verifiable utility cost savings, energy

savings, avoided costs and other incentive programs. Develop preliminary cost estimates for energy projects; develop energy project scopes; supporting DD1391 development; conduct economic analyses; calculate eROI for projects; determine appropriate funding source; review energy project design (pre-award); and provide SME support for energy related design and energy construction projects (post-award). Monitors and reports the status of project execution.

3.A.2 Plans and manages energy related in-house assignments and reviews capital projects for efficient energy use. Review and provide technical recommendations for energy and water savings on FEAD executed projects including MILCON, special projects, and minor work orders by reviewing submittals and design packages.

3.A.3 Has overall responsibility for the development and management of the installation's energy use and efficiency/conservation programs.

3.A.3.1 Establishes a highly visible energy and resource conservation program through awareness campaigns and training. Establishes and communicates station energy policies to all hands through various programs such as Public Service Announcements (PSAs) and preparing briefs for use at Joint Reception, Staging, Onward Movement, and Integration (JRSOI) Indoctrination Training, Tenant Command Briefs, etc.

3.A.3.2 Develops an energy management training program to instruct employees on energy conservation techniques and methodologies. Implements and manages a base-wide Building Energy Monitor (BEM) program to leverage FMR (Facility Management Representative) role in energy and water conservation. Provide training as needed on a monthly basis for new BEMs and conduct BEM quarterly training sessions. Provide conservation tips weekly.

3.A.3.3 Serves as the established technical resource for occupants, Building Energy Monitors, and operations and maintenance staff. Increases the recognition of the installation energy program through good management practices and preparation of reports, case studies, award submissions, and other program documentation.

3.A.4 Liaise with clients, tenants, contractors and Public Works to promote energy and water conservation awareness for the Base and develop recommended solutions.

3.A.5 Make visits to work sites to perform facility energy audits in order to develop requirements for energy and water conservation projects. Develops and maintains energy audits for all significant energy users. Performs technical engineering inspections, studies and audits of existing facilities and infrastructure to facilitate maintenance and repair of facility envelopes, components, and equipment. Submits work requests through Public Works FMR to address facility and equipment deficiencies which waste energy. Maintains a permanent record of all energy-related work requests and follows up monthly to track completion of requested work. Work request record shall be presented for review upon government request.

3.A.6 Reviews and monitors energy use trends and patterns. Tracks progress toward meeting DoD/DoN energy goals. Track and monitor energy and water usage and progress through DUERS (Defense Utility Energy Reporting System) and report to PWD and FEC management. Utilizes data generated by programs as available such as Defense Utilities Energy Report System (DUERS), Centralized & Integrated for the Comprehensive Utilities Information Tracking

System (CIRCUITS), and Computerized Utility Billing Integrated Control (CUBIC), etc.

3.A.7 Review and respond to energy related data calls. Prepares the Secretary of the Navy Shore Installation Energy and Water Management Annual Report. Complete any necessary data collection to respond to SECNAV Energy Awards, DUERS Quarterly data input and others as required.

3.A.8 Implements and manages a robust Measurement and Verification (M&V) program for all energy-saving projects as required. Incorporate measurement and verification (M&V) into energy related construction projects.

3.A.9 Develop renewable energy projects (solar photovoltaic, solar thermal hot water, and wind) by working with FEC EURAFSWA and EXWC on project development. Track renewable energy progress and goals. Review baseline studies, net-zero studies and other energy related assessments to incorporate projects.

3.A.10 Monitor process compliance with command energy policies and make recommendations for correction. Calculates statistical averages, cumulative and rolling averages, statistical trends, rates of change, percentages, etc., and tabulates, plots, and formats the results to maximize utility efficiency and cost avoidance. Runs computer programs associated with work assignments.

Assembles and compiles technical data on many different forms or in special format for use and analysis internally and for submittal to governmental agencies. Prepares written technical reports to identify utility consumption trends or areas for improvement. Enters data and statistics into processing devices using procedures as designated, and runs programs or executes procedures to obtain the necessary optimal output in proper format. Develops and produces presentation graphics materials for utility and energy management. Prepares forecasts, studies, technical reports, memorandums, letters, and related items.

3.A.11 Participate in regular progress meetings with Clients, contractors, Public Works officials and other interested parties regarding work in progress, completed, project status, discuss problems and provide recommendations to resolve issues. Communicates with and solicits support from the NAVFAC and Commander Navy Region EURAFSWA communities.

3.A.12 Attend Work Induction Board (WIB) meetings to present new work for scheduling and recommend appropriate routing and methods of accomplishment.

3.A.13 Participate in all "Partnering" activities with Clients, contractors and Public Works (workshops, meetings, etc.) as requested.

3.A.14 Provide technical support in answering requests for information (RFI) from service contractors. Provide support for contractors requiring base access for performance of energy studies and audits.

3.A.15 Complete all training the Government deems necessary. Training may be either for professional development that the Governments determines will enable the service provider to provide enhanced support, or may be on general topics such as Equal Employment Opportunity, Sexual Harassment, Trafficking in Persons, etc.

5.A Installation Energy/Engineering Management support services:

The employee must use experienced judgment and initiative in applying and adapting engineering principles and practices. Guidelines include standard instructions, technical literature, agency policies and procedures, manufacturers' catalogs, DoD instructions, and handbooks, precedents and standard practices in the area of specialization/assignment. The engineer independently selects, interprets, and applies the guides, adapting them when necessary to meet the requirements of the assignment.

5.A.1 Extensive technical and practical knowledge and experience (at least 3 years) as an Installation Energy Manager, Regional Energy Manager, Designer, Engineer, or Engineering Technician with energy-related experience.

Registration as a Certified Energy Manager (CEM) is required. Contractor employees who meet all other qualifications for initial employment shall obtain CEM certification within 6 months of being placed in the position.

5.A.2 Contractor shall possess at least a Bachelor of Science degree (or European/Southwest Asian equivalent) in Engineering. A fully qualified engineer with a degree in electrical, mechanical, civil, or industrial engineering or directly related engineering degree from an accredited engineering college or university. Registration as a Professional Engineer is highly desirable but not required.

5.A.3 Demonstrated working knowledge of engineering principles, building construction, construction science or maintenance management.

Professional knowledge and abilities applicable to a wide range of engineering duties; ability to modify standard practices and adapt equipment or techniques to solve a variety of problems; ability to adapt precedents or make significant departures from previous approaches to similar projects in order to provide for the specialized requirements of some projects; and ability to apply the standard practices of related engineering disciplines as they relate to energy conservation and utilities engineering design.

5.A.4 Demonstrated ability to develop projects, perform cost estimates, and perform technical evaluations to compare contractor proposals for technical soundness and make recommendations on reasonableness.

Prepare projects to reduce energy, solid waste, water, and sewer costs. Managing the preparation of plans, specifications and cost estimates for projects requiring engineering capability in electricity, water, gas, and wastewater. Develop energy and water conservation projects to manage and reduce utilities consumption and demand. Perform design oversight, management, and overall coordination of utility projects. Experience in 1391 Project Development Experience with calculating return on investments documentation.

5.A.5 Experience demonstrating a sound understanding of energy reduction programs, principles and practices applicable to energy efficiency, energy conservation, and alternative energy schemes related to targeted, energy-savings repair and alteration projects.

Experience in energy and resource conservation programs by conducting awareness campaigns and training. Ability to develop policies to reflect energy savings and losses. Ability to develop

building energy audits for significant energy users. Calculate statistical averages, cumulative and rolling averages, statistical trends, rates of change, percentages, etc. in order to tabulate, plot, and format the results to maximize utility efficiency and cost avoidance.

5.A.6 Demonstrated knowledge of maintenance practices and methods, and maintenance management skills; knowledge of principles of utility operations and engineering.

Knowledge of federal energy regulations and processes to pursue compliance. Recommend improvements to utility procurement and operations. Conduct engineering studies of equipment and services for utility and energy-related systems to determine capabilities, service effectiveness, and to make recommendations concerning service and operating methods.

5.A.7 Ability to write and speak fluent English in order to provide reports and make presentations to Government personnel; skill in information management.

Entering data and statistics into processing devices using designated procedures. Prepare reports, case studies, award submissions, and other documentation to increase the recognition of the energy program. Developing presentation graphics materials for utility and energy management. Providing background information and documentation for management consideration on major utility projects and technical matters involving utility projects. Prepare written technical reports to identify energy consumption trends, patterns or areas of improvement.

5.A.8 Demonstrated ability to monitor maintenance, repair and alteration projects to a successful and timely completion with respect to schedule and budget.

Ability to plan and monitor utility construction projects to ensure compliance with applicable objectives, standards, and requirements. Specific knowledge of utility services, rate structures, and capital investments related to utility systems, and energy management. Knowledge of principles of utility operations and engineering; engineering applications; value engineering and capital investment decision analysis. Skill in use and application of engineering economic principles.

5.A.9 Demonstrated knowledge of CIRCUITS (Centralized and Integrated Reporting for the Comprehensive Utilities Information Tracking System) and DUERS Utility and energy tracking systems.

5.A.10 Ability to perform strenuous activity while working outdoors in extreme heat or cold, working in confined spaces, climbing and using fall protection equipment will be required on this contract. Assigned contractor employee must present medical certificate of physical qualification showing that they are physically capable of performing the tasks outlined in the PWS, as well as to effectively work in the rigorous environment of Djibouti.

5.A.11 Demonstrated knowledge of safety and occupational health principles, practices, procedures, laws and regulations as they relate to maintenance performance requirements. (Outlined in the EM-385-1-1 and 29 CFR).

5.A.12 Must successfully pass required security background investigation, see paragraph 10 for complete security requirements.

6. PLACE OF PERFORMANCE

Services will be primarily performed on government facilities but may occasionally be provided off-site depending on program requirements. On-site work will be performed primarily at the government facilities onboard Camp Lemonnier, Djibouti.

7. PERIOD OF PERFORMANCE

The period of performance onsite at Camp Lemonnier, Djibouti is one calendar year from effective date of contract, as stated in block 3 of the award document, referred to as the base period. Personnel supporting this contract must be in place at Camp Lemonnier and ready to perform work within 10 calendar days of the contract award.

This task order includes two (2) option periods, which may be unilaterally exercised by the Government. The option periods shall not exceed one (1) year in duration. All terms and conditions applicable to the base period shall extend to the option period unless otherwise agreed upon in writing.

8. OPERATIONAL HOURS

The contract foresees on-site work will correspond to the Government's work week, Monday through Saturday. The Contractor shall coordinate actual work schedule with the COR. Services delineated in this PWS are expected to be performed by personnel paced at no more than 45 work hours per week, unless there is an official United States holiday listed in 8A during the week. As support is not normally required during official holidays, the required level of support is reduced by 8 hours for each holiday. As a result, Contractor employees are not expected to provide support during United States official holidays. Additionally, Djibouti national holidays in 8.B are listed for reference. Contract employees are expected to provide services during Djibouti holidays, but need to be prepared to make allowances for impacts that these dates may have on the ability to successfully complete necessary services. Emergency situations may require immediate response during normally off-duty hours, as directed by the COR and may require temporary adjustments to normal work schedules.

8.A United States official holidays (dates may vary for option years):

Columbus Day
Veterans Day
Thanksgiving Day
Christmas Day
New Year's Day
Martin Luther King's Birthday
Presidents Day
Memorial Day
Independence Day
Labor Day

8.B Djibouti official holidays (dates may vary for option years):

9. PAYMENT FOR UNAUTHORIZED WORK

No payments will be made for any unauthorized supplies and/or services or for any unauthorized changes to the work specified herein. This includes any services performed by the Contractor of their own volition or at the request of an individual other than the COR or Contracting Officer. All changes to the specifications, terms, and conditions under this task order require a modification to the task order executed by the Contracting Officer.

10. SECURITY REGULATIONS AND REQUIREMENTS

10.1 Work under this task order is UNCLASSIFIED. The Contractor shall comply with all applicable Department of Defense (DoD) security regulations and procedures during the performance of this task order. The Contractor shall not disclose and must safeguard procurement sensitive information, computer systems and data, privacy act data, and Government personnel work products that are obtained or generated in the performance of this task order. If necessary, the Contractor will be required to provide clearances for personnel requiring access to Government computers and workstations.

10.2 If required, within ten (10) days after award, the Contractor shall provide a list identifying the Contractor staff including: FIRST NAME, LAST NAME, MIDDLE INITIAL, NICKNAME, COUNTRY OF CITIZENSHIP, and JOB TITLE. This information will be used for obtaining and issuing Common Access Cards (CAC).

10.3 COMPLETED AND FINAL National Agency Checks with Inquiries (NACI) and FBI Fingerprint (submit via a SF-85P) ARE REQUIRED for access to computer network based project files and emails. NO EXCEPTIONS currently allowed.

10.4 - Use of Drugs is Prohibited: No drug use is allowed at any time, on or off base, this includes chewing Khat. Violation of this requirement may result in immediate removal of personnel from the installation and/or termination of this contract.

11. REIMBURSABLE EXPENSES (TRAVEL, CONFERENCE, TRAINING, EQUIPMENT OR MATERIALS, ETC.)

11.1 Travel is not required in the normal completion of duties.

11.2 The cost and means of local travel is the responsibility of the Contractor. The Government is not required to provide transportation to any Contractor employee.

13. ADMINISTRATIVE CONSIDERATIONS

Correspondence. To promote timely and effective administration, correspondence shall be subject to the following procedures:

- Technical correspondence (where technical issues relating to compliance with the requirements herein) shall be addressed to the COR.
- All other correspondence (that which proposes or otherwise involves waivers, deviations or modifications to the requirements, terms or conditions of this PWS) shall be addressed to the Contracting Officer.

14. NON-PERSONAL SERVICES STATEMENT

Contractor employees performing services under this order will be controlled, directed, and supervised at all times by management personnel of the Contractor. Contractor management will ensure that employees properly comply with the performance work standards outlined in the statement of work. Contractor employees will perform their duties independent of, and without the supervision of, any Government official or other Defense Contractor. The tasks, duties, and responsibilities set forth in the task order may not be interpreted or implemented in any manner that results in any Contractor employee creating or modifying Federal policy, obligating the appropriated funds of the United States Government, overseeing the work of Federal employees, providing direct personal services to any Federal employee, or otherwise violating the prohibitions set forth in Parts 7.5 and 37.1 of the Federal Acquisition Regulation (FAR). The Government will control access to the facility and will perform the inspection and acceptance of the completed work.

15. CONTRACTOR INTERFACE

The Contractor and/or his Subcontractors may be required as part of the performance of this effort to work with other Contractors working for the Government. Such other Contractors shall not direct this Contractor or this Contractor's Subcontractors in any manner. Also, this Contractor and/or its Subcontractors shall not direct the work of such other Contractors in any manner, unless the actions of any other personnel pose immediate danger to life or health of personnel.

16. DISCLOSURE OF INFORMATION

Information made available to the Contractor by the Government for the performance or administration of this effort shall be used only for those purposes and shall not be used in any other way without the written agreement of the Contracting Officer. The Contractor agrees to assume responsibility for protecting the confidentiality of Government records and other records disclosed or made available to the Contractor in connection with the performance of this contract, which is not public information. Each Contractor or employee of the Contractor to whom information may be made available or disclosed shall be notified in writing by the Contractor that such information may be disclosed only for a purpose and to the extent authorized herein.

17. ACCESS TO PROPRIETARY DATA

Performance of this effort may require the Contractor to access and use data and information

CONTRACT NO. N00178-10-D-6237	DELIVERY ORDER NO. N00178-10-D-6237-EJ08	AMENDMENT/MODIFICATION NO. 06	PAGE 12 of 28	FINAL

proprietary to a Government agency or Government Contractor which is of such a nature that its dissemination or use, other than in performance of this effort, would be adverse to the interests of the Government and/or others. Contractor and/or Contractor personnel shall not divulge or release data or information developed or obtained in performance of this effort except to authorized Government personnel or upon written approval of the Contracting Officer. The Contractor shall not use, disclose, or reproduce proprietary data that bears a restrictive legend, other than as required in the performance of this effort. Nothing herein shall preclude the use of any data independently acquired by the Contractor without such limitations or prohibit an agreement at no cost to the Government between the Contractor and the data owner which provides greater rights to the Contractor.

18. QUALITY ASSURANCE

The Government designated point of contact in paragraph 23 will review, for completeness, preliminary or draft documentation that the Contractor submits, and may return it to the Contractor for correction. Absence of any comments by the designated point of contact will not relieve the Contractor of the responsibility for complying with the requirements of this work statement. Final approval and acceptance of documentation required herein shall be by written approval and acceptance by the designated point of contact. The Contractor shall not construe any letter of acknowledgment of receipt material as a waiver of review, or as an acknowledgment that the material is in conformance with this work statement. Any approval given during preparation of the documentation, or approval for shipment shall not guarantee the final acceptance of the completed documentation.

19. GOVERNMENT FURNISHED PROPERTY/INFORMATION

19.1 The Government shall provide introductions to Contractor employees of all key Government representatives along with a briefing on their roles and functions in the organization, initial familiarization/orientation of task requirements, and any required hardware and software manuals or other documentation. Published guidance will be provided by the Government as needed, including but not limited to a variety of Federal, Department of Defense, Department of Navy, or Naval Facilities Engineering Command publications, manuals, directives, standards, policies, and procedures.

19.2 The Government will provide safety vests and hard hats. All other Personal Protective and Safety Equipment shall be provided by the Contractor. The Government will provide furnished administrative working space for Contractor employees' located onsite at Camp Lemonnier, Djibouti. Report generation and tracking through the use of Government databases are necessary functions for the services provided in this PWS, therefore the Government will furnish computer assets to for these functions.

20. OTHER TERMS AND CONDITIONS

Individuals assigned as Contractor employees will not serve on Technical Evaluation Boards, Price Evaluation Boards or Source Selection Boards as a voting or advisory member without first receiving approval for the use of advisory and assistance services by the NAVFAC Acquisition proponent in accordance with NFAS 37.203. In addition, these individuals will not be assigned as a Contracting Officer's Authorized Representative.
